

Installation Services

Surveys, installation and support

Installation

With 20 years experience in the installation industry, SystemWare staff have installed large projects ranging from military satellite communication systems and large airport DAS installations to retail small cell projects. We can survey, install, inspect and maintain a wide range of equipment and infrastructures. All projects are managed by a single POC and installed by highly qualified and professional engineers.

Our unique team provides military operational experience, engineering and installation excellence and business acumen, all combined to deliver exceptional customer satisfaction, service quality and flexibility. We are proud to have been supplying key military, government and commercial customers for over 10 years.
